

ANANT GARG AND NIKHIL SRIVASTAVA :

Helped in the organization of The Massachusetts Institute of Technology Global Startup Workshop (MITGSW) the world's premier workshop dedicated to fostering entrepreneurship, inspiring future innovators, and building entrepreneurial ecosystems globally. The event was in collaboration with MIT students and KGS Advisors. Their responsibilities included designing all the creative's and developing the website along with handling the Elevator pitch competition on ground. We also helped in event management by dealing directly with the sponsors and MIT people pre-event. It was a great learning experience and making friends with MIT graduates added to it. Also, we got an opportunity to increase our network meeting both novice and expert tech entrepreneurs with wide experience in the corporate.
